

Texas Longleaf Ecosystem Restoration Team

Providing Technical Assistance in Managing Longleaf Pine

Experts from multiple agencies have united to better serve you, the landowner. We stand ready to help you with your land management needs. Our longleaf pine management services include:

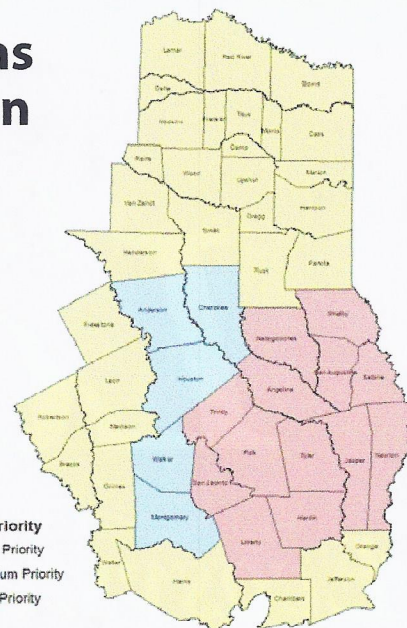

- Conducting site visits to confirm that the property is suited for longleaf pine
- Helping landowners develop a comprehensive plan for their property in order to
 - guide management decisions
 - detail landowner objectives
 - develop maps (location, soils, stands, etc.)
 - identify alternative practices to achieve goals and objectives
- Providing site prescriptions to help landowners either establish new or manage existing longleaf pine and learn how to keep the forest healthy and vibrant
- Assisting landowners with enrollment in state and federal cost share assistance programs that support their specific management goals
- Providing educational opportunities, field demonstrations and general consultation upon request.

Call, click or come by to meet with one of our professionals and take the first steps toward meeting your property management goals.
