

Texas Longleaf Conservation Assistance Program

Overview

The Texas Longleaf Conservation Assistance Program provides financial and technical assistance to eligible landowners for the establishment and management of Longleaf Pine and bottomland hardwood ecosystems.

Historically, Longleaf Pine covered much of the Southeast including Southeast Texas. However, as the country began moving west, many of those acres were lost. Today, many groups are working together to restore Longleaf Pine to its historical range while also managing existing areas of Longleaf Pine.

The Texas Longleaf Implementation Team, a multi organization group including federal, state, private and NGO partners, through funds provided by the National Fish and Wildlife Foundation, is working with landowners to increase and manage Longleaf pine in Texas.

Benefits

Eligible participants can receive financial and technical assistance to establish or enhance longleaf pine and bottomland hardwood ecosystems through implementing conservation practices such as prescribed burning, site preparation, reforestation, and forest stand improvement. Payments are made to participants after conservation practices in a forest management plan are implemented.

Eligibility

Landowners with property located within 19 East Texas Counties (see map) are eligible to apply. Eligible land includes pastureland, forestland, and other farm and ranch lands. Approved participants may receive up to 50% payment not to exceed a standard cap rate for implementing approved conservation practices.

Applicants must:

- Control or own eligible land
- Have a written forest management plan
- Comply with all Texas Forestry Best Management Practices
- Agree to all program restrictions and requirements

TEXAS LONGLEAF IMPLEMENTATION TEAM

Allowable Program Rates*

Prescribed Burning - \$30/ac

Site Preparation/Tree Planting - \$450/ac

Forest Stand Improvement - \$275/ac

** approved participants will receive 50% payment of total cost up to the maximum amounts listed above*

Longleaf Pine Quick Facts

Where to Plant: well drained sandy and sandy loam sites within the priority counties

Seedling Options: containerized seedlings

When to Plant: November—February provided adequate soil moisture

Site Preparations:

- Prescribed Burning
- Shearing
- Raking
- Piling
- Bedding
- Ripping
- Herbicides

How to Apply

Interested landowners must complete an application form which can be provided by calling (936) 225-2175 or by visiting <https://txlongleaf.org>.

Members from the Texas Longleaf Implementation Team can assist eligible landowners with developing a forest management plan and schedule of activities. This will become the basis of the Texas Longleaf Conservation Assistance Program agreement.

All applications will be ranked based on a number of factors including, but not limited, to: site suitability, tract size, ability to complete prescribed practices, ecosystem diversity, and Longleaf connectivity.

Figure 1: Priority Counties

Priority Counties Include:

Angelina	Chambers
Cherokee	Hardin
Houston	Jasper
Jefferson	Liberty
Nacogdoches	Newton
Orange	Panola
Polk	Rusk
San Augustine	Sabine
Shelby	Trinity
Tyler	

Additional Information

- Continuous sign-up, applications can be submitted at anytime
- Land must be in a priority county; highest priority given to projects within SGA boundaries (yellow and orange polygons)
- Approved practices must be completed before project expiration date
- Participants must provide paid invoice of implemented practice and allow site visit for field verification to receive reimbursement
